

App Requirements Specification

Project: Social Group Application (Ojas Connect) | Stakeholder Review Draft

This document outlines the proposed features and user workflows for the community application. Please review the sections below to ensure the functionality aligns with the group's needs, and provide feedback on the questions at the end.

1. Core User Roles

- **Standard Member:** Can view the directory, RSVP to events, post business promotions, and manage their own profile.
- **Administrator:** Has full control to approve new registrations, deactivate members, access historical member logs, and moderate content.

2. Registration & Onboarding Flow

- **Application Process:** New users download the app and submit a registration form containing Personal Details, Family Information, Date of Birth, Anniversaries, and Business Description.
- **Approval Gate:** Accounts remain inactive in a "Pending Approval" state until an Administrator verifies and approves them.

3. Member Directory & Networking

- **Digital Directory:** A searchable database of all community members.
- **Advanced Search:** Users can search for specific services or business types (e.g., typing "Hardware" to find relevant member businesses).

4. Meetings & Event Management

- **Event Feed:** A dedicated section displaying upcoming meetings with Date, Time, and Location.
- **RSVP System:** Members can confirm attendance (Yes/No).
- **Guest Tracking:** Members bringing guests must input the guest's name into the app for organizer visibility.

5. Business Promotions & Direct Zero-Fee Payments

Members can pay a fee to broadcast their business or services to the entire group on the main dashboard.

Payment Strategy Recommendation: Standard payment gateways (like Razorpay, Stripe, or BillDesk) typically charge a **2% to 2.5% transaction fee** on every payment. To avoid losing community funds to gateway fees, the app will use a **Direct UPI Method (0% fee)**.

- **Workflow:** Member uploads their promotional content → The app displays the official Group UPI ID and a scannable QR Code → Member completes the payment on their preferred UPI app (GPay, PhonePe, Paytm).
- **Verification:** The member enters their Transaction Reference Number (UTR) into the app. An Admin verifies the receipt of funds and clicks "Approve."
- **Visibility:** Once approved, the promotion goes live on the dashboard, and a push notification is dispatched to all members' devices.

6. Administrator Capabilities

- **Member Moderation:** Approve, reject, or deactivate members.
- **Historical Archiving (Past Members):** When a member leaves the group, they are not permanently deleted. They are marked as "Inactive."
- **Audit & Search Logs:** Admins can specifically search through the "Past Members" database (e.g., to locate a former member for returning community property).
- **System Logs:** Tracking of when members joined, left, or rejoined the community.

Stakeholder Feedback Required

Please review the following open questions so we can finalize the technical logic:

1. **Profile Visibility:** When a member clicks on another member in the directory, should they be able to see the *entire* profile (including Family Details, DOB, Anniversaries), or should they only see a restricted view (like just Name and Business Details)?
2. **Payment Verification Process:** Since we are using zero-fee UPI QR codes, is it sufficient for the member to just enter their Transaction ID (UTR) for the Admin to verify, or would you prefer they also upload a screenshot of the payment receipt?
3. **Promotion Duration:** Once a member pays for a business promotion, how long should it remain active on the Home Feed? (e.g., 24 hours, 1 week, 1 month?)
4. **Past Member Visibility:** Should standard members be able to search for "Past Members," or is that strictly an Admin-only capability?
5. **Guest Limits:** When a member RSVPs to an event and clicks "Bring a Guest," is there a limit on the number of guests they can add?
6. **Data Fields:** Are there any additional fields required during registration that have not been mentioned (e.g., Blood Group, City Area, or specific Business GST numbers)?
